United Nations Development Programme

To Whom It May Concern,

It is my distinct pleasure to recommend Yu Junjie, who served as a Software Engineer Intern with the United Nations Development Programme (UNDP) from 1 August 2025 to 9 January 2026. During his tenure with our team at UN City in Copenhagen, Junjie consistently demonstrated exceptional professionalism, technical capability, and dedication to his work.

Junjie's primary achievement was the successful development of our internal Satellite Communication Service Inventory and Tracking Application. This system replaced a previously fragmented, Excel-based process and now provides real-time visibility into global inventory and subscription statuses. Junjie managed the entire development lifecycle, including database design, user-friendly data entry interfaces, and a custom analytics dashboard. His ability to independently architect and deliver a production-ready solution was particularly impressive.

Beyond his technical contributions, Junjie exhibited strong critical thinking, self-directed learning, and innovative problem-solving. His understanding of sustainability issues and the Asian context added valuable perspective to our global mandate. He also demonstrated excellent communication skills and worked seamlessly with colleagues across functions.
Given his competence, professionalism, and strong work ethic, I am confident he will be a valuable asset to any team he joins.

Should you require any further information regarding Junjie's work or performance, please feel free to contact me.

Sincerely,

TIN WIN AUNG
